

PREMIUM Velcro disc TFC for eccentric grinders DISC-P 150 P 45 P F ZA

654.706144

This Tyrolit Fast Change (TFC) tool is available with both thick paper and thin fibre backing. In combination with the incorporated zirconium aluminium oxide, this means maximum aggressiveness as well as the longest possible lifetime for the operator. Active coolants additionally ensure a cool and clean finish on the workpiece. Thanks to a Velcro fastening on the back, these Velcro fastening discs can be changed quickly and easily. Especially with the disc with fiber backing, you can easily machine smaller welding seams as well as spot welds.
