

## **Hambi mesh bender MBH 401 V**

520.20240

Machine specifically suited for bending steel mesh, concrete mesh. The hydraulic MBH version has the advantage that very compact dimensions for cages bent from mesh can be achieved.

### Features:

- Reinforced construction and bending cams;
- Hydraulic drive system;
- 2 bending speeds;
- Easy and quick adjustment of the bending cam positions;
- Setting up 3 bending angles up to 180°;
- Equipped with anti-rotation feature and central locking;
- With bending roll rail, preventing damages to the welded wire mesh;
- Larger bending cams (45, 60 and 75mm) are available on request.

### Technical information:

- Bending capacity with 30mm bending cams: max. 40 x Ø12 mm, max. 25 x Ø14 mm;
- Working width: 4 meter;
- Voltage: 400V / 50Hz;
- Power: 7.5 kW;
- Dimensions (mm): 4400x750x950;
- Weight: 900 kg.
