

Rebar bending machine MSB56-E (3x400V-50Hz), with 2-speed and controller

510.10363

Features:
· Electrically driven bending machine for rebar.
· Simple and robust design with two adjustable guides.
· The bending plate can rotate both left and right.
· Two bending speeds allow for higher speed when bending thinner diameters.
· Angle adjustment by means of programmable display. Bending shapes consisting of several different bending angles, both positive and negative (up to 20 pieces) in one cycle.
· In addition, a counter is provided to count the number of bends.

Bending tools included:
· 7 bending rollers (Ø60-70-80-95-120-150-175mm)
· 3 bending pins
· 1 stirrup bending tool
· 1 small diameter bending pin
· 1 foot pedal
Technical information:
· RPM: 5
· Motor capacity: 5.5 KW at 3φ 400V/50Hz
· Max. bending capacity at R=650 N/mm²: 1×Ø46, 2×Ø36, 3×Ø30mm
· Max. bending capacity at R=850 N/mm²: 1×Ø42, 2×Ø34, 3×Ø26mm
· L×W×H: 130×95×89cm
· Weight: 710 kg
Control panel:
